

AI Shopping Assistant - User Guide

Welcome to the AI Shopping Assistant! This guide will help you understand how to use the shopping assistant to find the perfect outfits for your travels.

User Journey Flow

Getting Started

Logging In

A screenshot of a login form. The form is centered on a light gray background. It consists of two white input fields with rounded corners. The first field is labeled "Customer ID" and the second field is labeled "Password". Below these fields is a blue button with rounded corners labeled "Login".

Customer ID

Password

Login

1. Open the application in your browser
2. Enter your Customer ID (e.g., "CUST-0000001")
3. Enter your password
4. Click "Login" to access the shopping assistant

Starting a Conversation

Once logged in, you'll see the chat interface. The AI assistant will greet you and is ready to help you find clothes for your travels.

How to Use the Shopping Assistant

Step 1: Tell the Assistant About Your Trip

Start by sharing your travel plans. The assistant understands natural language, so you can say things like:

- "I'm traveling to Paris next week"
- "Planning a beach vacation to Miami in February"
- "Business trip to London for 5 days"
- "Going hiking in Colorado this weekend"

Step 2: Answer Clarifying Questions

The assistant may ask follow-up questions to better understand your needs:

- **Destination:** Where are you going?
- **Travel Dates:** When are you traveling?
- **Activities:** What will you be doing? (sightseeing, business meetings, hiking, etc.)
- **Preferences:** Any specific style, color, or brand preferences?

Step 3: Use Suggestion Bubbles

After each response, you'll see **suggestion bubbles** - clickable buttons with helpful responses. These suggestions are tailored to your conversation:

Suggestion bubbles appear based on conversation context:

No destination?	→	[Europe]	[Beach]	[Mountains]
No dates?	→	[Next week]	[This month]	[Flexible]
No activities?	→	[Sightseeing]	[Business]	[Hiking]
After products?	→	[More options]	[Different style]	

Simply click a suggestion bubble to send it as your next message!

Step 4: Browse Product Recommendations

When the assistant has enough information, it will show you product recommendations:

- **Product Cards:** Each product shows an image, brand, name, price, and available sizes
- **Hover for Details:** Hover over a product to see available sizes
- **Add to Cart:** Click "Cart" to add items to your shopping cart
- **Quick Buy:** Click "Buy" for instant purchase

Step 5: Shopping Modes

The assistant supports two shopping modes:

Online Mode

- Standard e-commerce experience
- Add to cart and checkout online
- Products delivered to your address

In-Store Mode

- Shows store location information ("Floor 1")
- Shows real-time stock availability
- "Show me" button displays store map with product location

Features

Context Popup

When discussing a travel destination, a **context popup** appears showing: - Destination name - Travel dates - Trip duration - Current weather at the destination

This helps you see at a glance what the assistant knows about your trip.

Product Details

Click on any product card to open the **detailed view**: - Larger product image - Full description - Size options - Color variations - Customer ratings - Add to cart functionality

Shopping Cart

Access your cart by clicking the cart icon: - View all added items - Adjust quantities - Remove items - See total price - Proceed to checkout

Agent Thinking (Optional Debug View)

The system tracks how the AI processes your requests internally. This information includes: - Which agents are working on your query - What information has been extracted - Decision-making process

This data is available in the API response for debugging purposes.

Tips for Best Results

Be Specific

The more details you provide, the better recommendations you'll get: - ❑ "I need formal wear for business meetings in Tokyo next month" - ❑ "I need clothes"

Mention Activities

Activities help the assistant recommend appropriate clothing: - Hiking → Outdoor gear, hiking boots - Business → Formal wear, dress shoes - Beach → Swimwear, light fabrics - Sightseeing → Comfortable walking shoes, layers

Specify Preferences

If you have preferences, share them: - "I prefer blue colors" - "Looking for Nike or Adidas brands" - "My budget is around \$200" - "I wear size Medium"

Start Fresh

If you want to plan a completely different trip, say: - "Let's start over" - "New trip" - "I want to plan a different vacation"

Common Questions

How does the assistant know the weather?

The assistant automatically fetches current weather data for your destination to recommend weather-appropriate clothing.

Can I see more product options?

Yes! Just ask: - "Show me more options" - "Any other styles?" - "What about different colors?"

How do I change my trip details?

Simply update the assistant with new information: - "Actually, I'm going to Rome instead" - "Change the dates to next month" - "Add hiking to my activities"

Is my conversation saved?

Yes, your conversation is saved so you can continue where you left off. To start fresh, use the reset option or say "start a new trip."

Troubleshooting

Products Not Loading

- Refresh the page
- Check your internet connection
- Try resetting the conversation

Assistant Not Responding

- Wait a moment - AI responses may take a few seconds
- Refresh the page if stuck
- Check if you're logged in

Incorrect Recommendations

- Provide more specific details about your needs

- Correct any misunderstandings ("I meant hiking, not biking")
 - Reset and start with clearer information
-

Contact Support

If you experience any issues or have feedback, please contact our support team through the application's help section.

Happy Shopping!
